

ARCONAS

Aerea™

DESIGNED BY DOUG BALL

Aerea

Aerea multi-purpose lounge seating, created for Arconas by renowned designer Doug Ball, offers you the perfect blend of durability, design flexibility, and comfort. Combine seat, arm, table and beam length options to create configurations that personalize your space. Choose from a range of fine finishes and premium fabrics to suit your taste, decor and location. From busy waiting areas to corporate lounges, you can tailor Aerea to meet your needs. Aerea enables you to create attractive spaces where visitors enjoy unsurpassed comfort no matter the setting or the length of their wait.

Aerea: An environmentally friendly seating solution

We designed Aerea to meet our high environmental standards. Aerea's seats and backrests are made from injected, moulded, fire-retardant, high-resiliency urethane that's CFC-free and low-VOC. Up to 20% of the foam we use is made with BiOH® polyols—an environmentally friendly soy-based petroleum substitute.

Aerea sofa and bench units with 22-inch seats. Sofa features optional arms. Seating and benches can be configured with or without gaps between seats.

Lounge Collection

Aerea lounge seating is available in standard armchair, loveseat and sofa configurations. Ottoman, two- and three-seat bench units and a coffee table are also available. Silver frame finish enables Aerea seating to easily fit into modern interiors.

Aerea loveseat is part of the lounge collection. Custom powder coat finishes are available.

Custom Design Your Own

Aerea's highly flexible, component-based system allows you to create custom seating configurations that meet your needs. Combine different seat widths, arms, tables, and other options to suit your specific requirements for comfort capacity and personal space.

Combine 30- and 22-inch seat widths on the same beam.

Healthcare

Aerea was designed with the healthcare sector in mind. Aerea's versatile system allows you to create waiting areas that withstand high patient traffic. A range of attractive, durable finishes – including fabrics designed specifically for healthcare environments – make Aerea an excellent, easily maintained choice for any healthcare facility. Robust seat cushions and ergonomic design help make those potentially long waits easier for patients, family members and other visitors.

Aerea components are specifically designed to provide outstanding comfort and support in bariatric care applications.

- . Hospital Lobbies & Lounges
- . Emergency Waiting Areas
- . Clinics & Offices
- . Pharmacies

30-inch bariatric seats can be configured with 22-inch seats on the same beam

Sweep-through cushions for easy maintenance

Thick cushions offer extra comfort and support

Public Waiting Areas

Aerea's versatile design fits into any corporate or institutional setting, offering clients and visitors VIP comfort as they prepare for their next important meeting. Optional inPower™ Flex modules allow them to recharge their phone, tablet or laptop while they wait. Aerea seating adds high style to any public waiting area, while its durability makes it an excellent investment.

- . Lobbies
- . Lounges
- . Reception Areas

Choose woven textiles, faux leather or leather upholstery

Wood veneer tabletops in maple, oak and walnut (above)

Tabletop upgrades include solid surface and granite

Aerea lounge seating is installed at Des Moines Area Community College (Arkeny, IA), the University of Alaska Museum of the North (Fairbanks, AK), and City of Mesa public buildings (Mesa, AZ).

Passenger Terminals

Aerea seating is ideal for demanding high-traffic passenger terminal environments, with lumbar support and thick cushions to put travellers at ease. Choose 22-inch seats to maximize seating capacity in hold rooms, or 30-inch seats to provide more comfort and personal space in lounge areas and post-security recomposure zones. Add optional power components such as inPower™ Flex modules to allow travellers to charge their devices while they wait.

Aerea's open design also provides security personnel with clear sight lines under seats. Seats and backs are secured to the beam independently and can be easily replaced without disassembling the entire unit.

- . Airports
- . Hold Rooms
- . VIP Lounges
- . Rail & Bus Stations
- . Cruise & Ferry Terminals

inPower™ Flex below 13-inch intermediate table

Cantilever arm with upholstered or urethane arm pad

Wall-saving back legs

Aerea systems are in use at Cincinnati/Northern Kentucky International Airport (Hebron, KY), John C. Munro Hamilton International Airport (Hamilton, ON) and Regina International Airport (Regina, SK).
