

Plug. Play. Work.

ARCONAS

inPower™ bar

The inPower™ Bar is a "Plug & Play" modular counter system designed to provide a functional work surface and charging station for public areas, that requires no hard wiring.

- Free standing option comfortably sits up to six people.
- Leg panels are equipped with up to six inPower™ flex modules that provide AC and USB charging.
- Certified to UL standards and only requires a single power source, without adding costly hard-wiring.
- Each leg is equipped with two leveling glides. Optional non-slip rubber bottom surfaces can be added for use on hard floors.
- A bracket is available to attach the inPower™ Bar to a wall. The legs can be floor mounted using anchor bolts through the base.
- inPower™ Stools are available to complement the counter system.
