

spectrum lounge

spectrum lounge

product information

Designed by Jeffrey Bennett and Nicholas Dodziuk for Studio TK, the Spectrum™ lounge series meets traditional office needs but also covers new ground in planning, problem-solving and aesthetics.

The Spectrum sofa divides space and defines zones with the ability to run for an infinite span. Individual pieces can also be configured to create islands. The end armrests support tablets and laptops, while loose armrests flip to reveal a hard surface for writing or work tools.

Spectrum's modularity creates quadrants with the potential to use different fabrics and alternate colors and textures, projecting an aesthetic that ranges from bold and provocative to refined and subtle.
